Show online

DetectaPlast Plasters are both metal detectable as well as x-ray visible. Hypoallergenic adhesive and latex free. 18cm x 2cm.

**ILLBY PLAST**  
plast - muovi - plastics

DetectaPlast Dual Detectable Plasters are metal detectable and x-ray visible, feature hypoallergenic adhesive, are free from latex and are coloured bright blue for easy visual identification.

These plasters contain an aluminium foil strip and an x-ray thread, making them detectable by correctly calibrated in-line metal detection and x-ray inspection systems. These products are not compatible when used in conjunction with aluminium foil packaging, due to similarity with the detectable attributes of the plasters.

The plasters also feature hypo-allergenic, medical grade, high tack adhesive, they are latex free and have a 5 year shelf life. DetectaPlast plasters feature a wash proof polyethylene film, making the plasters durable and long lasting in harsh food manufacturing environments.

Article No	DPUX62
Material	Polyethylene film, aluminium foil strip, x-ray thread, latex free lint
Detectable	Yes
Color	Blue
Food safe	Yes
Order number	DPUX62
Measurements	18cm x 2cm
Weight product	126g
Packaging unit	100
