

WeLoc Bag Clip 150/320mm

[Show online](#)

The perfect product for sealing sacks and bags in a hygiene sensitive environment. Metal detectable, x-ray visible and fully durable.

ILLBYPLAST
plast - muovi - plastics

These WeLoc® detectable bag clips are ideal for securely sealing ingredient sacks & bags, whilst minimising the risk of foreign body contamination. These clips have a 150mm and 320mm sealing length, and allows easy release when access to the bag is required.

The advanced detectable polyacetal co-polymer material is designed specifically for the food industry, featuring a high temperature range (-50°C - +120°C), high tensile strength, high fatigue and impact resistance as well as resistance to moisture, lubricants, solvents and many other neutral chemicals. This material is dual detectable (metal detectable and x-ray visible).

The WeLoc® detectable bag clips are manufactured from FDA food contact approved materials, see further details in the standards compliance section of the specification sheet.

Article No	WECLIP
Material	Polyacetal copolymer
Detectable	Yes
Color	Blue
Food safe	Yes
Order number	WECLIP
Weight product	0.10
Packaging unit	1
