

DETECTAPEN ECO V2.0

[Show online](#)

No springs and other useless parts. Optimized for metal and x-ray detection in the food and pharmaceutical industries.

ILLBYPLAST
plast - muovi - plastics

The new BST Eco v2.0 DetectaPen has a new streamlined design to guarantee writing comfort.

They have a one-piece metal-detectable and x-ray visible plastic body. It is molded in one piece, which means that the pen does not contain springs and other useless parts, it is only wetted by two main components, the body of the pen and the ink cartridge.

FDA and EU food contact approval.

The pens are also impact resistant and lanyard compatible, contain silver ion antibacterial technology and are optimized for metal and x-ray detection in the food and pharmaceutical industries. The Xdetect® compound also contains antibacterial technology that is effective against harmful bacteria and mold.

The ink cartridge is made of solid brass, and you can choose either a nickel-plated or brass writing head. Both the nickel-plated and brass nibs contain a 1mm stainless steel writing ball.

Thanks to the high-quality ink cartridge, the pen offers a smooth and smudge-free writing experience.

DETECTAPEN ECO V2.0

Article No	ECO2
Size	145x9mm
Weight	8g
Material	Metaldetectable plastics
Stainless steel	Yes
Detectable	Yes
Color	Blue
